GSTN has announced a major upgrade to the e-way bill system! A new portal E-Way Bill 2.0 (ewaybill2.gst.gov.in) will go live from 1st July 2025, designed to ensure business continuity and real-time inter-operability with the existing portal.

Why the New Portal?

To address frequent disruptions and system downtimes faced on the original portal. E-Way Bill 2.0 ensures you're never stuck again — both portals will mirror data in real time

Key Features of E-Way Bill 2.0:

- ❖ Works even if E-Way Bill 1.0 is down
- ❖ Real-time sync between both portals
- ❖ Use either portal to:
 - *Generate new e-way bills
 - * Extend validity
 - * Update transporter details
 - * Generate & retrieve consolidated e-way bills
 - * Update Part-B info

APIs Enabled:

All services are available via API for integration into ERPs/logistics systems. Sandbox already live for testing!

Uses:

- ✓ If one portal is down, perform all tasks on the other
- ✓ Carry slips from either portal – both valid
- ✓ Criss-cross operations fully supported
- ✓ No impact on compliance
